

DELIVERABLES & PRICING BREAKDOWN

Project: Kids Area Multitenancy (Financial Metrics & Revenue Share Engine)

COMPLETED WORK

Date: August 31, 2026

Total Amount for Completed Deliverables
5 Itemized Tasks Included • Financial Engine & Multi-Tenant Analytics

\$190.00 USD

1. Implemented Telco Revenue Share & Financial Metrics Calculation Engine (FinancialMetricsService).	\$90.00
WHAT WAS IMPLEMENTED FROM CODE: - Telco Deductions & Split Engine: Implemented complete mathematical model in FinancialMetricsService.php for VAT (7.5%), MTN Operator Share (50%), Aggregator Share (10%), Withholding Tax (4%), and NCC Levy (1%). - Partner Distribution: Calculated Net Balance splits for YNS Net Revenue (80%) and VAS SUNYCH Share (20%) in local currency. - P&L, ROI & Conversion: Built real-time USD conversion (NGN/KES to USD), Net P&L (USD) vs Ads Cost, and Daily ROI % calculations. - Daily Variation & Watch Alerts: Implemented day-over-day revenue variation tracking and automated Watch Alerts (ALERT if revenue drops). - Optimized SQL Aggregations: Built high-performance grouping queries for new subscribers, campaign renewals, and ad spend.	
2. Built Financial Metrics Dashboard API & Streaming CSV / Excel Export Endpoints.	\$45.00
WHAT WAS IMPLEMENTED FROM CODE: - Paginated Dashboard API: Implemented index() in FinancialMetricsController.php supporting date range filters (from/to), dynamic exchange rate overrides, tenant resolution, pagination metadata, and overall summary totals. - Streaming CSV/Excel Export: Built export() endpoint streaming large reports in chunks with UTF-8 BOM encoding for Excel compatibility. - Route Configuration: Registered /dashboard/financial-metrics and /performance/daily-financials in routes/api_v1.php for tenant and landlord.	
3. Configured Multi-Tenant Plan Pricing & Identifier Normalization (SubscriptionPlan Enum).	\$15.00
WHAT WAS IMPLEMENTED FROM CODE: - Plan Key Normalization: Added normalizePlanKey() in SubscriptionPlan.php resolving plan durations (1day, 1week, 2weeks, 1month) and product IDs. - Tenant Pricing Engine: Added getPriceForTenant() returning dynamic price points by market (e.g. Nigeria NGN tiers vs Kenya KES flat rates).	
4. Created Database Migration for Campaign Renewals Tracking (Tenant Schema).	\$10.00
WHAT WAS IMPLEMENTED FROM CODE: - Tenant Schema Migration: Created 2025_11_22_153000_create_campaign_renewals_table.php adding campaign_renewals table. - Indexed Architecture: Configured foreign keys for campaigns (UUID) and users, plan IDs, renewal amounts, and indexed renewed_at timestamps.	
5. Implemented Automated Test Suites & Postman Documentation.	\$30.00
WHAT WAS IMPLEMENTED FROM CODE: - Unit Calculation Tests: Developed FinancialMetricsCalculationTest.php testing 100% precision on VAT, telco shares, P&L, ROI, and variation alerts. - Feature API Tests: Developed FinancialMetricsControllerTest.php testing pagination, date filtering, exchange rate overrides, and CSV streaming. - Postman Documentation: Created Financial_Metrics_Dashboard.postman_collection.json with complete endpoint requests and sample responses.
